

LOVE THE SKIN YOU'RE IN

1

The skin is the body's largest organ.

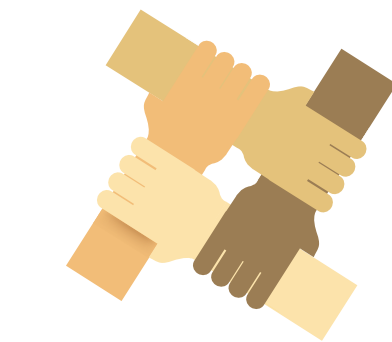

8

In winter you can get sunburnt at high altitudes.

2

The thinnest part of your skin is found on your eyelid.

You need to SLIP, SLOP, SLAP and WRAP to protect your skin.

9

3

The thickest part of your skin is found on your foot.

6

Skin colour is the result of a protein called melanin.

4

Your skin has three layers.

Epidermis
Dermis
Hypodermis

7

You can get sunburnt even on cloudy days.

10

There are a lot of different skin colours but everybody has to protect the skin they're in.
