

Design a SunSmart Poster

Design a poster that encourages people to be SunSmart. Make sure you are demonstrating your understanding of the things that people can do to reduce their exposure to UV radiation.

Draft your poster here:

Consider the elements you have included on your draft poster. Make some notes to explain why you have chosen these elements and the impact you expect your poster to have.

SunSmart Poster – Peer Feedback

Name: _____

Date: _____

Designer's Name: _____

Shade or circle the box that best describes the poster you are giving feedback on.

	★	★★	★★★
SunSmart Elements: Slip, Slip, Slop, Slap, Wrap	Two or less SunSmart elements.	Three or four SunSmart elements.	All five SunSmart elements.
Sun Protection Times	No mention of sun protection times.	Sun protection times are mentioned but no information about how to check them.	Information is given about how to check sun protection times.
Layout and Design	Layout is too cluttered or too bare.	Layout is mostly neat with some exceptions.	Layout is neat and well organised.
Spelling and Grammar	There are mistakes throughout the poster.	There are a few mistakes in the poster.	There are little to no mistakes in the poster.
Graphics	The graphics are not related to the topic.	The graphics are mostly related to the topic.	The graphics are directly related to the topic and make the poster easier to understand.
Impact	The message of the poster wasn't clear.	The message of the poster was mostly clear.	The message of the poster was clear, and made me think about the topic in more depth.
